## Idle balls money glitch

Idle Balls is a fascinating new idle game from Voodoo. This iOS-exclusive game consists may seem too simple at first. When you start, you only see a plain white ball appearing on the screen while hitting numbered orbs, all against a black background. As you progress in the game, you will be able to unlock different types of balls, including basketball, tennis balls, football, and so on. They will all bounce around the screen, helping you clear more numbered orbs at the same time. Of course, that doesn't mean the game will get easier. Each new ball is harder to unlock than the previous one. The cost of unlocking new balls will continue to climb and you will need to have a good strategy if you want to be able to handle it. It's good that you can count on our bum balls cheats, tips and tricks to help you unlock all the balls! 1. Keep Unlocking Balls as mentioned above, as more bouncing balls on the screen will help you clear more numbered orbs quickly. Since this is an empty game, it will play mostly on itself without needing much login from you. One thing to watch out for, however, is when you can unlock a new ball. You can leave the game while taking care of other things, but make sure it regularly comes back to unlock new balls as soon as you can. There is no good reason for you to hold on to unlocking new balls and the sooner you can get them, the sooner they will be able to help you get more orbs. If you need to choose between upgrading and unlocking a new ball, select the latter. You can always upgrade later when you get rich. 2. Upgrade your Tap Balls are not the only things that can clear orbs. You also have the option to press orbs to clear them. If you have time to focus on the game, tapping will be a much faster way to develop through the levels. Make sure you upgrade your power so you can clear orbs manually. This is especially important when trying to clear angular orbs. Bouncing balls will rarely hit orbs that are in the corners, so you will need to manually remove them yourself. If you do not upgrade your eavesdropping power, you can simply imagine how long it will be tapping to get rid of 50k corner orbs. 3. Use multiple fingers When you decide it's time to make a manual touch, make sure you use multiple fingers. This will help you press faster, which in turn, clears orbs faster. Remember the \$50,000? It will take forever to clarify that even with an improved tap, if you just use one finger. The best thing to do is to put your device on the surface, then use a few fingers to smash the screen until you clear all the orbs. It can be tiring, but it is a good way to your eavesdropping power. 4. Double your offline earnings The game is a nice way to spend your quick breaks. You can take it at any time and opt out when necessary. The good thing is that you keep winning even when you're offline. In fact, you will win offline than when you are actively playing. Your earnings will depend on the number of balls you have unlocked and what their levels are. However, make sure you have an Internet connection when you enter the game. This is to ensure that you get the offer to watch an ad in exchange for doubling the amount you earned while offline. It's an easy way to get huge revenue, so take advantage of it when you can. Do not worry if you really can not connect to the Internet, though. You will still be able to collect your offline earnings, you will simply miss out on a double offer. 5. Watch ads for Boosts another nimble you can get from watching in-game ads is through the amplification menu. You can get three different increases from watching video ads. The first boost will double your earnings in four hours. That's the most important thing, so make sure you always get it. The second will give your taps 10x value, but it lasts only 20 seconds. You can only take it if you plan to do some basic manual clearing. The last push will double the balls you have in the game, but it lasts only for a minute, which is not much better than the second. Of course, every push is still a big help in the game, so if you have time to watch three ads, it's always good to get all three. 6. Prioritize larger balls This is one of the strategies to keep in mind when upgrading balls. Larger balls tend to hit more orbs, therefore clearing the board faster. Give them priority when upgrading so you can get the most out of clearing power. Once you have upgraded the big balls to a decent level, you can work on making all the upgrades even in the sense that they all cost roughly the same. This will help make sure that none of your balls are rendered useless at higher levels of the game. 7. How to arrange level If you were dependent on your offline earnings to unlock balls, you'll probably notice that you haven't progressed in level. This is because the levels are not dependent on the points of stay. The only way to proceed to the next level is to clear the orbs on the current screen. If you haven't cleared orbs, you'll stay on the same level, even if you've earned millions from your time offline. More advanced levels offer more points, so be sure not to ignore the time for manual play. Unlocking all these balls can be a difficult task, but with the help of bum balls cheats, tips and tricks listed above, you'll get all the balls you want! iPhone - iPad games Home / iPhone - iPad / submenu box from menu and detailsSeparation: VoodooAl.
